The Excellent Showing In the Columbia Mine.

THE WINZE IN THE ROSA

INDICATIONS OF A LARGE PIPE OF HIGH-GRADE STUFF.

The Old Hickory—Jim Kennelly, the
Veteran, In From Beaver Lake—
De Lamar and Bingham—Believed
That the Control of the day before.

Swansea was a trifle stronger than during the previous call and had hardly recovered from the severe bear attack of the day before.

The transactions of the day were as follows: That the Captain Will Invest In the "Old Reliable"-Dexter Gaining Ground-Tone of the Mining Share Market Steadily Improving -The Mineral Exhibit-A Fine Display Made In the Old Hall of Relics-Camp Floyd Mines-Finishing Touches Being Given to the Old Hall of Relics-Patent Mineral Surveys Ordered-Coalville Min- lows: ing Congress Delegates-Ore and Bullion-Silver and Lead-Mining Notes and Personals.

Word was received from Lion Hill yesterday that at the Columbia the day before, the men at work in the winze from the drift from the Rosa shaft had taken out and saked for shipment 40 sacks of high grade mineral, and that arrangements are being made for a consignment of hot stuff from this property at an early day, and The Herald's informant also stated that the body of ore in which the men are working is gaining in size, the indica-tions being that it will widen out into tions being that it will widen out into a large pipe of high grade ore very similar in character to those disclosed in the workings of the Chloride Point, the near neighbor of the Columbia, which is believed to be a continuous ledge or deposit between the two properties, the showing in the Rosa shaft being only 1,200 fees from the bodies of mineral exposed in the Chloride Point, while it is believed that the Columbus shaft, which is on a line between the two workings, and which is down a depth of 150 feet, will break into the Chloride Point ore zone, within 50 or 60 feet more, as the indications are now very favorable.

Quite a force is now employed in the development of the Columbia, a portion of which is engaged in taking out pay

of which is engaged in taking out pay ore in the kosa workings, and in push-ing development work in this direction, while at the same time the Columbus shaft, which is well timbered, is being pushed downward as rapidly as pos-sible, and it is the intention of the sible, and it is the intention of the company to make a great showing in the property before this time and the first of the year, when it is believed the mine will take rank as a proposition that will justify the erection of a mill for the treatment of low grade ores, while in the meantime frequent con-signments of good shipping mineral will find their way to the Salt Lake market.

The Mercury Mercury, in speaking of

At the Columbia, says:
At the Columbia everything is looking well, and Superintendent Clark is deing his best to develop a mine that will equal anything on Lion Hill. That the company has the right man to find the company the company has the right man to find the ore in that locality, will be readily admitted, for Mr. Clark has worked on the hill almost from boyhood. The ground is being opened up at two different points. On the Clumbia claim a shaft is being sunk, the depth reached is 150 feet, and has recently been timbered in a substantial manner. In the Rosa the drift at the bottom of the 60-foot shaft has been driven a distance of 65 feet on the vein, which is stendily increasing in size. The ore averages 80 ounces silver and 30 per averages 80 cunces silver and 30 per cent lead. About ten tons of this high grade ore are on the dump, and a ship-ment will be made about July 10.

THE OLD HICKORY.

Actually, as he states that since taking hold of the proposition he has opened up a spiendid body of mineral, from seven to eight feet between walls, which will carry average values of 9 per cent copper, while through the deposit there is a zone of high grade truck, the sorted ore for shipment run-

and within the next two weeks expects to be in the market with a shipment of rich stuff, to be followed hereafter by

According to "Jim," there are activity in the camp at the part time, and a number of experts and representatives of capital are making a tearful examination of the district, iging up promising properties, among he number being Ben Hampton and P. A. H. Franklin, who will return to Salt Lake the first of the week.

Included in the contents of his grip Mr. Kennelly disclosed some fine samples of high grade copper or apon his arrival in the city, the specimens coming from the Gothland and Summit chaims, adjoining the Hickory. There is a remarkably good showing on this group of two claims, which Mr. as a markably good showing on this group of two claims, which Mr. as a markably good showing and he announces his intensation of concentrations of the past year, is doubtless due to the resumption of what quotations of the past year, is doubtless due to the resumption of what quotations of the past year, is doubtless due to the resumption of what quotations of the past year, is doubtless due to the resumption of what quotations of the past year, is doubtless due to the resumption of any operations now beginning at the many operations now beginning at the many operations now beginning at the many operations on the past year. The management announces that intensation of concentrating apparatus.

There will soon be a large force of men at work, while the improved market at work while the improved market at work, while the improved market at work while

In Rocky district, adjoining Beaver-Lake, the Montreal company is hard at work. A shipment of high grade ore was made from this mine a few days ago, and another one will soon follow; while A. Murphy, who is working the Magrie Williams, adjoining the Montreal, will soon have a carload of "hot stuff" on the market.

DEXTER GAINING GROUND.

cur recording slight gains in the bid-cing with asking figures virtually un-changed. An upward tendency was noticeable in Mammoth, which changed hands at \$1.67%. Dalton & Lark chron-icled a sale at 16 cents, the stock be-ing firm and closing arrong. Northern Light was whittled down and at the end of the call was week at 1 cent bid and 2 asked. Sarr sinto was a favorite with the dealers, a block of 1,000 shares posting a transfer at 61 pents.

summated in Chloride Point, which was steady at former quotations. Sumbam was on the down grade and saffered losses during the call, rates being registered at the opening at 10 cents, while has been arranged through at the close a transfer was made at 8½. Richmend & Anaconda was also in Gemand, a beard lot being dropped at 5½ cents, more of this sacurity being wanted before the close without drawing out any more of the stock. Dexter was a hummer and rapidity and vanced from \$1.30 to \$1.37½ in the bidding, the latter bid being withdrawn to \$1.35 before the close, the stock being offered at \$1.4½. Swansea was a list in good form and in excellent demand at the quotations given below, while columbia touched 25 cents in the bidding, with offerings at 50. South Swansea was a trife stronger than during the previous call and had hardly recovered from the previous call and had hardly recovered from the severe hear attack.

DE LAMAR AND BINGHAM.

Believed That the Captain Will Invest in the "Old Reliable."

The Bulletin dishes up the week's mining news for Bingham as follows:
It is understood that Mr. De Lamar will visit Bingham shortly after adjournment of the Mining congress, on business connected with the recent test of Dick Mackintosh ore, and that steps may soon be taken looking to the erective of the erective regiments of the erective regiments and the erective regiments and the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are stated to the erective regiments and the erective regiments are regiments. Jim Kennelly, the Veteran, In From Beaver Lake District.

Jim Kennelly, the veteran miner and mining operator, is in from Beaver Lake District.

Jim Kennelly, the veteran miner and mining operator, is in from Beaver Lake mining district, where, for the past four or five months, he has been in charge of the development and operation of the Gid Hickory mine, a property that had quite a reputation as a producer of high grade copper ore in the early days, and which bids fair to surpass all former records in this line under the able superintendency of Mr. Kennelly, as he states that since taking hold of the proposition he has opened Lamar it will not be because his trusted agents deem the inducement insufficient. Yesterday the statement was made by a party in a position to speak intelligently that should Mr. De Lamar's business engagements prevent him from promoting this enterprise, a combination of capitalists abundantly able to put it on its feet will take hold of it at an early day. Great interest is expressed in mining circles informed

of it at an early day. Great interest is expressed in mining circles informed as to the result of Mr. Cohen's recent investigations.

An experimental trial of the Swan-Bemis mill was made yesterday. There were the usual stoppages to tighten beits and adjust machinery, but last evening everything was working "fine as a fiddle," except the elevator, which it will be necessary to speed up. The will be necessary to speed up. The re treated was a low grade lot from ore treated was a low grade lot from the Old Spanish. Concentrates are handsome and beyond doubt will show excellent work. Mr. Bernis said last evening that he was highly pleased with results. He plans that everything will be in order to begin regular business on the 5th. For the present, operations will be confined to one shift, treating about 60 tons daily. Ultimately another set of rolls and another Wilfly will be added, when it is believed that the plant will do as nearly perfect work as is possible by any

There will soon be a large force of men at work, while the improved market insures a larger net income for the company than it had during its former dividend-paying period.

Speaking of the fine showing of copper which late developments have made in the Winnebago mine, the New York Engineering and Mining Journal thinks it is of more than ordinary moment as showing the continuation of the Bingham copper belt to the east. The Winnebago exposes a well marked pyritte nebago exposes a well marked pyritic copper zone, varying from two to four

Tone of the Mining Share Market Is Steadily Improving.

There was a big attendance at the call of the mining stock exchange yesterday morning, the pit being crowded while standing room in the lobby was at a premium, great interest being manifested in the transactions of the day.

As usual, but little was done in the listed stocks other than the establishment of quotations, the leading securides as a general thing, holding their own in good chape, while several advances were noted. Geyser-Marion was the first of the doubt.

TINTIC DISTRICT.

The great mines of the Tintic dis-The great mines of the Tintic district have the largest display of the earth's riches. All along the north side of the building are Tintic's ores.

The Bullion-Beck, which has given up its treasures for many years in the past, has displayed a very fine collection of galena, lead, silver, gold and copper ores. copper ores, The Eureka Hill comes next in line

The Centennial-Eureka, Gemini, Mammoth, Grand Central, Swansea, South Swansea, all of which form one shining galaxy of dividend payers, along with the Ajax, and a number of other properties, including Jesse Knight's Humbug mine, make up Tin-tic's quota.

MERCUR CAMP.

The "Johannesburg of America," bet-ter known as Mercur, has an exhibit which cannot fail to do it credit. In the Mercur section of the building can be seen ores from the big mines of the district, such as the Mercur. Sacra-mento, Geyser-Marion, Hercules and Captain De Lamar's great Golden Gate mine. The Sunshine and Overland mines have a pretty display of cyanid-ling cress.

ing ores.

Lion Hill is represented by the Chloride Point and Northern Light, with an exhibit of chloride silver ores. BINGHAM ORES.

The "old reliable" camp of Bingham has a large display of lead, silver and copper ores, and will hold its own with the other big camps. From Bingham are ores from the Montezuma, Julia Dean, Greely, Last Chance, Old Jordan and Galena, Telegraph, Cuba, Winnemucca, Petro, Free Coinage, North Star, Tlewaukee and a number of others. The Tiewaukee is owned by Colonel Shaughnessy, and produces rosin zinc.

PARK CITY'S DISPLAY.

The Silver King, whi h comes up with ts regular dividends each month of 37,000, has a display of high grade ores its regular dividences the state of the stat WEST TINTIC.

The mines of West Tintic are well represented with gold, lead and silver ores from the War Eagle, Orient and other properties.

CLIFTON DISTRICT. Clifton district, in Tooele county, which is yet in its infancy, so mar as big mines are concerned, has reported with a very creditable showing. This district is rich in its deposits of gold. silver and copper; mostly low grade. The district, like its neighbor, Deep Creek, is kept in the background on ac-count of lack of transportation facili-Deep

Only a few exhibits have been reonly a rew exhibits have been re-ceived from Stateline, Gold Mountain and some of the more remote districts of the state, but space has been re-served for displays from these parts, From the Beaver Lake district, in Beaver county, only one exhibit has arrived, that of the Copper Mountain company, which has a fair sample of red oxide of copper, gold and silver ore, of which the property is said to have some immense bodies.

A pyramid of sulphur from the mines whend by the Utah Sulphur company.

A pyramid of sulphur from the mines owned by the Utah Sulphur company, arrived yesterday and was put in place directly in front of the main entrance. The mineral exhibit from the chamber of commerce will occupy a place in the middle of the building. These specimens mave been rearranged, dusted off and re-tagged and will form no small part of what is to be seen in the hall of relies during the session of the congress.

The decorations in the Hall of Relics

The decorations in the Hall of Relics have been all arranged.

The national colors are in evidence everywhere. These were arranged by Mr. C. D. Goodsell, who certainly deserves much credit for the artistic manner in which he executed his work. An attractive feature of the display will be a small cyanide plant in operation, such as are used to extract the

will be a small cyanide fount in opera-tion, such as are used to extract the values from the ores in Mercur. This plant will occupy the southwest corner of the building and is being put in by Mr. Will Orr, of the McArthur-Forrest Cyanide company, of Denver, which was the first to introduce this process of ore reduction into the United process of ore reduction into the United

Taken all in all, the display is a splendid one and will surely be one of the interesting features of the congress, giving, as it will, an insight into the resources of Utah as to its great mineral wealth.

CAMP FLOYD MINES.

Finishing Touches Being Given to the Daisy Mill.

Mercury, in its weekly ound-up of mining news, says: The old Surprise shaft, on the Golden hate ground, which has been aban-loned for a number of years, will now become useful in the operations of the big mine. A hoist has been put in the old shaft house, and pipes connecting it with the air compressor, laid. A force of men is at work timbering the shaft, which is 489 feet deep. As soon as the work of the shaft, which is 489 feet deep. as the work of timbering is completed. the shaft will be connected with the workings in the mine.

The Dalsy mill has reached the stage where finishing touches are in order. This work is necessarily slow, but it was hoped the trial run would be in progress by July 1. It will take a few days longer, however, and no attempt will be made to start up until after the Fourth. The hoist is running all all right and everything about the mine is in condition to furnish all the

Charlie Charleton, who has been the east for some time, is back to Utah again and reports that he found many people in Chicago and other points who propose in Chicago and other points who are already interested in mining property in this district, and they were so well satisfied with their investments that it is highly probable considerable money will be invested from the same localities this season.

Fred Redmond was in town Wedness and reports matters at the White-

Fred Redmond was in town Wednesday and reports matters at the White Pine, above the Ophir Hill mine, as working smoothly. Over a carload of high grade silver ore is sacked and next week the company will make a two-car shipment to the smelter.

Superintendent Charleton's arrival will probably soon be followed by an increase of the force at work on the Snowstorm, it being the intention to continue development work on the property with a view to having it ready for a mill next year.

The Buckeye company, whose prop-

lodes, in West Mountain district. Application made by Mary Olsen and Peter Gunderson. J. F. Smith, surveyor. No. 3,735, for the South Extension Houghton lode, in Tinite district. Application made by J. H. McChrystal et al. Frank Anderson, surveyor.

plication made by J. H. McChrystal et al. Frank Anderson, surveyor.

Coal company. Hon, Charles A. Callis.

Locations Filed at Provo. Provo, July 2.-Charles W. Higginson has located the Dutch Girl, situated in the Santaquin Mining district. Hans H. Peterson has located Dewey Hobson and Mary in the North Tine Mining district.

Silver and Lead.

The silver and lead quotations yeserday were as follows: Bar silver, 58% cents. Lead, brokers', \$3.80. Copper, casting, \$10.50.

Ore and Bullion. The ore and bullion receipts yes-

erday were as follows: McCornick & Co., ores, \$5,500; buiion, \$7,530. T. R. Jones & Co., bullion, \$17,805; tres, \$14,290. Bamberger & McMillan, ores, \$10,284.

Mining Notes and Personals.

The Grand Central was in from Mam-noth yesterday with another eight-car lot As Monday is the glorious Fourth and a legal holiday, there will be no call of the mining exchange tomorrow.

Commercial National bank,

The Hansuer smelter has been closed down for several days for the purpose of making the usual annual repairs.

down for several days for the purpose of making the usual annual repairs.

Hereafter the mining department of The Herald can always be found on the sixth page of the paper, occupying the first and second columns.

The Old Telegraph, of Bingham, is shipping at the rate of 700 tons of good ore monthly, and this old producer is making a great record.

Dexter was in good demand on the curb yesterday afternoon at \$1.37\frac{1}{2}\$, and sales could have been posted at \$1.40 if seliers had been more plentiful.

A small lot of cyanides from the Rochester mill in Montana, were received yesterday by Majoriji. E. Jackson, of the Consolidated Kansas City sampler.

It is learned that Sam Gordon is in from Dugway with a shipment of ore from a groperty there in which he is interested that runs high in lead and from 600 to 700 ounces in silver to the ton.

A nice exhibition of salipetre from the

ounces in silver to the ton.

A nice exhibition of salipetre from the new find below the mouth of Mill creek, will be made during the mining congress. The owners of this property are sanguine that it is the making of a bonanaa.

The Dalton and Lark, of Bingham, has started up his opicentrator and is now installing a 100-horse-power boiler at the mine, besides which the two boilers in place of 50 horse power each, are being repaired.

The double compartment shaft at the Ajax mine has been despend by 100 feet during the past 20 days and it is the intention of the company to sink 300 feet deeper, when the shaft will have attained a depth of 52 feet.

the residents of the camp look forward to an era of increased prosperity.

Review, Tuscarora, Nev.: Notwithstanding the recent addition of tanks to the Dexter cyanfile plant, nearly doubling its capacity, the new mill is producing tailings so rapidly that it is to the plant to its utmost to keep up. There are now ten circular tanks holding to cars each and four square tanks with a capacity of about 80 cars each. At present about 150 cars a day are being leached.

Several of the employees of the Century company, operating in Box Elder country, who are down for the Fourit, join in the statement that the mine is in excellent condition and that the little six ton Huntington mill is turning out about 150 per month in gold buillon. The company is not satisfied with this output, however, as 50 tons could be as essily handled as six, and it is more than likely that a stamp mill will be installed on the property in the near future. The property is shewing up fine bodies of good milling ore and is being opened up in fine shape.

Played Out.

Dull Headach, Pains in various parts of the body, Sinking at the pit of the stomach, Loss of appetite, Fever-ishness, Pimples or Sores are all posi-tive evidences of impure blood. No tive evidences of impure blood. No matter how it became so, it must be matter how it became so, it must be purified in order to obtain good health. Acker's Blood Elixir has never failed to cure Scrofulous or Syphilitic poisons or any other blood diseases. It is certainly a wonderful remedy and we sell every bottle on a positive guarantee. JULY 4TH EXCURSIONS.

Via Oregon Short Line, One fare for the round trip to all points, July 2, 3 and 4. Limit, returning, July 5.

the Spaniards, Who Took Several House Will Probably Agree to Pacific

New York, July 2.-A dispatch to the reached an agreement on everything New York, July 2.—A dispatch to the Fress from Siboney, Cuba, June 30, via Playa del Este says: For the first time in the history of the United States, a war balloon was sent up this afternoon, making observations of incalculable benefit to General Shafter's forces in the field occupied by the enemy, and over the doomed city of Santiago. It was manned by two members of the signal corps. Of all the recognoissances made inside the Spanish lines by spies from our army, no information brought.

balloon.

Since the disembarking of the troops and the advance made toward Santiago, nembers of the signal corps have been anxious to try the balloon and today permission was given to use it. Preparations for sending up the air ship were speedily made, the hydrogen gas for charging it was brought out, and the wagon containing the reels for the wire cable which was to hold it captive, was put together.

wire cable which was to hold it captive, was put together.

When everything was ready two members of the signal corps entered the car, guy ropes were released and the balloon, looking like some monster endowed with life, shot up into the air while the soldiers cheered their comrades who were going on a mission full of peril.

The balloon was sent up from an open, elevated space, not far from General Shafter's headquarters, near Siboney. While it soared in the air, seeming to almost touch the cloudless sky, fully 1,800 feet above ground, it was in plain view of the American army and the men on the war ships lying off the in plain view of the American army and the men on the war ships lying off the coast. They watched it with the greatest interest and no doubt it was with mixed feelings of wonder and fear that the officers and men in the Spanish army, in Cervera's fleet and the propie in Santiago, viewed its souring over the territory held by them.

The men in the balloon were soon aware that they had been sighted by the Spaniards, for missenge's ran about and shots, evidently from machine gune, were aimed at them. The swaying motion of the huge bag and the

ing motion of the huge bag and the effect of the gravity, however, prevented any of the projectiles from nitting it and the Spaniards soon gave up, evidently not wishing to waste ammu-

evidently not wishing to waste militin.

Everything that could be desired was to be seen by the men in the balloon. In the harbor of Santiago Cervera's ships swung placidity at anchor, and now and then launches could be seen passing back and forth among them. With their telescopes the Spanish warships, the camps and the city were brought into close range, but all the information geined is in the possession of General Shafter and some of the members of his staff.

Sketches and maps were drawn, showing the enemy's location.

SPANIARDS TORTURE CUBANS

SHOCKING BARBARITIES IN CEN-TRAL CUBA.

One Cuban Officer Blown From a Cannon's Mouth and Another Tortured -Cuban Official Arrives.

Washington, July 2.-Captain Nichoduring the past 26 days and it is the intention of the company to sink 29 feet

The Centennial-Eureka company bald
off —vien yesterday and will close down las Perez Stable, aide-de-camp of the

visit is toward securing further co-operation between the entire Cuban forces and the United States troops.

Captain Stable says President Masso and his cabinet are strongly located at El Esperanza, which is highland. They have temporary quarters, and have temporary quarters, and have maintained themselves successfully against frequent attacks by Spanish ticops. Captain Stable reports for the first time the details of a hot engagement which occurred recently. The Spaniards numbered 4,000, while the Cubans' defense was maintained by Spaniards numbered 4,000, while the Cubans' defense was maintained by only 800. Notwithstanding this discrepancy, the Cubans lost only 47 killed and wounded, while the Spaniards lost 30 killed on the field, indicating that their entire loss in killed and wounded was much greater. The Spaniards captured two Cuban officers, a first and a second lieutenant.

Captain Stable says these officers were subjected to the most cruel and phuman indignities. One of them was inhuman indignities. One of them was placed by the Spanish commander in front of a cannon, and, at a given signal, was blown to atoms. The Spanish commander then called for a volunteer to "degoliado" the remaining officer. This consists of thrusting a bayonet through the neck of the prisoner from one side to the other, penetrating the windpipe. A Spanish volunteer stepped forward, and the Cuban officer was thus subjected to the torture of a slow thus subjected to the torture of a slow death. Captain Stable states also that two small boys, not over 14 years, non-cembatants, who were driving cattle, were also killed by the Spaniards. Except by these brutal atrocities the Spanish raid on El Esperanza was futile, and the Spanish force finally retired, leaving President Masso and his cabinet still malataning, their

cabinet still maintaining their seat of government. Captain Stable was sent on his visit to the war department by Senor Juna-zea. It is probable that these confer-ences will result in a fuller understanding as to the co-operation when the American army begins to make its way west to the central part of the island.

TRAIN ROBBERS' BIG HAUL.

Secured All the Cash On a Texas & Pacific Train.

Officials of the Pacific Express company decline to make public how much money the robbers secured, but they took all in the safe. Rumor places the amount all the way from \$10,000 to \$50,000.

DEFICIENCY BILL CONFERENCE.

Railroad Amendment. Washington, July 2.-The conferees

on the general deficiency bill today

All senate amendments for the war and navy are retained in the bill; also all certified claims. The senate amend-ment appropriating \$145,000 for the pur-chase of land adjacent to and dredging the entrance of Pearl Harbor was elim-inated. The impression is that the Pa-cific railroad amendment will be agreed to in the house which with the adon-

New York, July 2.—The Financier says a gain of \$12,526.800 in deposits, necessitaling an extra reserve requirement of \$3,-131,700, against which the gain in cash was only \$2,935,000, accounts for a de-crease of \$157,700 in the surplus reserve of crease of \$182.700 in the surplus reserve of the New York clearing house banks for the week ending July 2. The unusual expansion in deposits is due mainly to the fact that the government funds received from bond subscriptions are being p. red in special depository banks. Thus the National City and the Hanover National, two of the principal institutions holding this money, report between them a gain of over \$5.000.00 in deposits, or 7 per cent total increase for the week. The gain in loans, however, runs well throughout the entire list of banks, and is one of the most favorable developments of the week.

in loans, however, runs well throughout the entire list of banks, and is one of the most favorable developments of the week.

In the last 90 days the loan expansion has been £5,000,000 and the total is now about the same amount under the extraordinary high point attained February 2. Deposits, however, surpass all previous records by £1,000,050, and in view of the special operations of the treasury will probably attain within the next month a total far above anything yet recorded. The current statement is confusing and does not balance, but the operations which are bringing about the changes are well defined, and will continue to show for some weeks to come.

The important point is that surplus reserve seems to have attained its higher average. As high as treasury expanses are, in view of the war, they will hardly equal the receipt on boad subscription account and while a large part of the extra money will go into specially designated banks, the operation will the up more or less moner. In the meantime there is no cessation of the demand for funds on the part of mercantile and crop borrowers here and elsewhere, and these requirements will have to be met. After July 14 the allouments of the large bids will call linto question a great deal of money now lying idle.

All these circumstances will have a rendency to keep money employed and while no one looks for anything as tringency, mency will not be a drug on the market, deeplite the fact that the country possesses something like \$175,000,000 of specie and other currency which it did not have at this time last year.

Denver Live Stock.

head. Market strong; native beef steers, 4.0094.50; Western steers, 1.2004.60; Texas steers, 3.5004.30; cows and helfers, 1.500, 4.00; stockers and feeders, 3.8004.90; buils stags, etc., 3.0094.00.

Hogs-Receipts 6.30 head. Market was strong to be higher; heavies, 3.009.30;; mixed, 3.600.3.63; nigher; heavies, 3.009.30; bulk of sales, 3.000.3.65.

Sheep-heccipts 500 head. Market was steady; fair to choice matives, 3.8004.30; fair to choice westerns, 2.709.4.53; lambs, 4.0096.00.

London Wool Sales.

London, July 2 .- The wool market was extremely animated throughout. Cape of extremely animated throughout. Cape of Good Hope and Natal wools shared in the rise, and greasy merines solo well a few to America. There was a good selec-tion of the finer greasy cross-brees. They were mostly taken by the home trade. The competition among continental buy-ers was spirited. The number of sales offered today was 18474. Following are the sules in detail: New South Wales—1,200 bales; scoured, 84,04218 567, greasy, 56,04.

New South Wates—1,200 bates; scoured, 1012dgi 501; greasy, 50,001.
Queensland—1,290 bates; scoured, 1012dgi 18 614d; greasy, 54,694d.
Victoria—100 bates; sreasy, 51,6010d.
Tasminia—400 bates; scoured, 51,2dgi 18 4d; greasy, 51,2dgi 10d.
Cape of Good riope and Natal—400 bates; scoured, 11d.
New Zealand—6,700 bates; scoured, 505

pped New Zealand-6,709 bales; scoured, 50 was 854d. STORIES OF THE DAY.

> Lord Odo Russell's Diplomacy and Disraeli's French. In "Collections and Recollections, by

One Who Has Kept a Dairy," whose

author is suspected to be G. W. E. Russell, from his manifest intimacy with Lord John Russell, occurs this anecdote about Disrnell: When the condote about Disriell. When the coingress of the powers assembled at Berlin in the summer of 1878, our ambassador in that city of stucco palaces was the loved and immented Lord Odo Russell, afterward Lord Ampthill, a born diplomatist, if ever there was one, with a suavity and affectionateness of manner and a charm of voice which would have enabled him, in homely phrase, to whistle the bird off the bough. On the evening before the formal opening of the courses. Low Beaconsfield arrived call of the mining stock exchange yeartready morning, the public provaded in an ecompleted the work from the mine

to the state bedroom, where our venerable plenipotentiary was beginning these very elaborate processes of the toilet with which he was prepared for the couth. "My good lord," began Lord Odo, "a dreadful rumor has reached us." 'Indeed! Pray, what is it." "We have heard that you intend to open the proceedings tomorrow in French." "Well, Lord Odo, what of that?" "Why, of course we all know that there is no one in Europe more competent to do so than yourself, but, then, after all, to make a French speech is a commonplace accomplishment. There will be at least half a dozen men at the congress who could do it almost, if not q-ite, as well as yourself. But, on the other hand, who but you can make an English speech? All these plenipotentiaries have come from the various courts of Europe expecting the greatest intellectual treat of their lives in hearing English spoken by its greatest living master. The question for you, my dear lord, is, will you disappoint them?"

Lord Beaconsfield put his glass in his eye, fixed his guze on Lord Odo, and then said: "There is much force in what you say. I will consider the point." And next day he opened the preceedings in English.

It has been found in Germany that lightning rods do not protect high furnaces, the electric discharge preferring to pass to earth by the column of heated smoke, which, of course, is rich in carbon, a conductor of electricity. It is partly for this reason that so many partly for this reason that so many smoking chimneys are struck by light-ning, and that to sit near a fireplace is dangerous.

A singular custom prevails among the Tartars and Kurds. If a man gets into difficulties, i. e., loses his cattle or other movable property, he pours a little brown sugar into a piece of colored cloth, ties it up and carries one such parcel to each of his friends and acquaintances. In return he is presented, according to circumstances, with a cow, or sheep, or a sum of money. He is thus at once set on his legs again. legs again.

The newspaper readers of Madrid have been informed that Theodore V. Roosevelt is the commander-in-chief of the American army; that he was formerly a New York policeman, who was born near Harlem, but emigrated to America when young and was educated at Harvard academy. Harvard, it is added for the edification of the credulous Madrilenians, is a commercial school, there being no universities or colleges in America
